

A Closer Look at Bioregions

Tundra

1. How might animals adapt to the long, cold winters of the tundra?

2. Give two examples of how plants adapt to the short growing season of the tundra.

Wetlands

1. Using the chart below, compare the photographs in your textbook of the wetlands and the tundra. What is the same and what is different?

Same	Different

2. What is biodiversity?

3. Why does a wetland have more biodiversity than the tundra?

Woodlot

1. Look at the picture of the woodlot on page 58. What might some advantages and disadvantages be for animals living at the edge of the forest?

Good	Bad
